MORE THAN MEETS THE EYE

On the outside it looks like turf, but the Nursery Sod Growers know that it's so much more.

When you purchase Number One Grade Turfgrass Nursery Sod from members of N.S.G.A., you receive a product grown by employing the best techniques of modern agronomy. Grown from superior grass strains, the turfgrass sod has been carefully nurtured ensuring that the unseen roots are just as strong and healthy as the grass you see.

Natural Pollution Control

- Our lawns trap and remove dust and dirt from the air.
- Absorbs carbon dioxide from the atmosphere.
- Average house lawn produces enough oxygen for a family of 4.

Natural Air conditioner

Our lawns have a great cooling effect on our neighbourhoods.

Natural Filter

Our lawns purify water passing through it.

Natural Soil Protector

Our lawns control water and wind erosion.

Natural Playground

Our lawns are a safe place to keep our kids active.
